

Are you tired of excessive co-payments on your chronic medication?

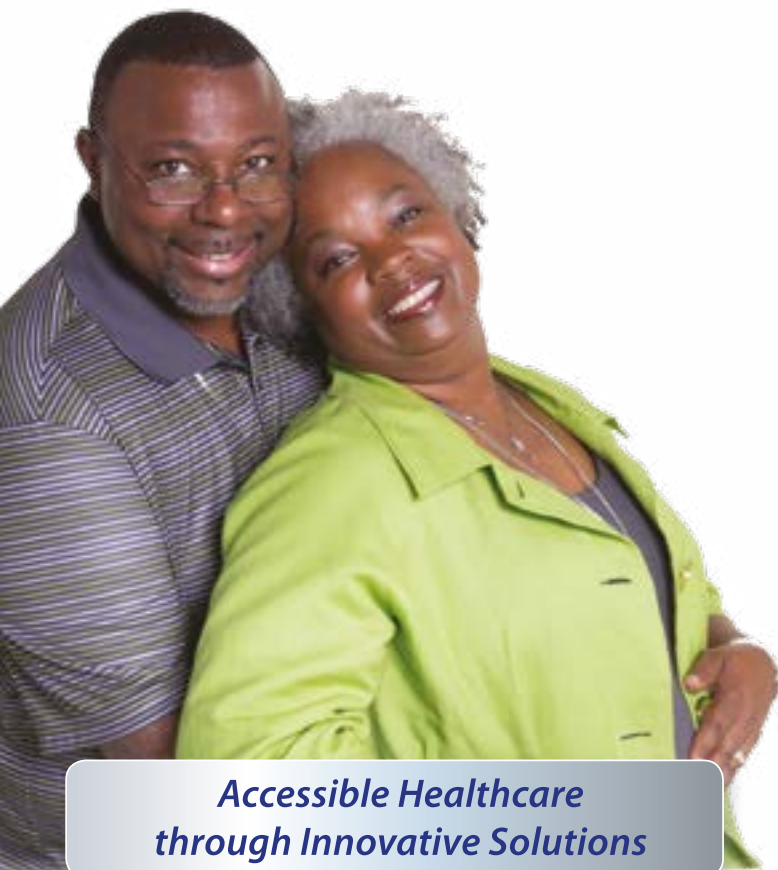

# Thrive Pharmacy

Your

# AlphaScRipt™

accredited network provider

AlphaScript will reduce your co-payments by adhering to your Medical Scheme rules!

Accessible Healthcare through Innovative Solutions

## Who is AlphaScRipt?

- AlphaScript is a registered pharmacy specializing in the management and supply of chronic medication;
- AlphaScript is the Central Chronic Medicine Dispensing Unit of the Alpha Pharm community pharmacies.

## Did you know?

AlphaScript offers you:

- ✓ an accessible nationwide network of community pharmacies that are linked to the centralized AlphaScript Dispensing System to allow you the patient the convenience to collect your medication from your network pharmacy;
- ✓ When you are travelling and there is no network pharmacy near your destination will AlphaScript deliver your chronic medication free of charge at your destination.

## What are the benefits to you, the patient?

- AlphaScript and your Pharmacist have entered into an agreement to manage your chronic condition as follows:
  - ✓ Obtaining chronic authorization for your chronic medication from your medical scheme;
  - ✓ Registration of your chronic disease(s) that falls within the Prescribed Minimum Benefits ("PMB's") as set out by the Council of Medical Schemes, which your medical scheme is obliged to reimburse in full, irrespective of your benefit option;
  - ✓ Conformance to the prescribed Medicine Formulary of your medical scheme to provide you with the most cost-effective and clinical appropriate chronic medication to stretch your chronic benefits and to reduce your co-payments;
  - ✓ Management of the life-cycle of your chronic prescription by timeously informing you of:
    - the renewal date thereof to ensure that your chronic condition(s) remain controlled and that your PMB's don't expire;
    - Confirmation of your monthly medicine requirements to prevent over-servicing and wastage;
    - Advance notification of the collection date of your chronic medication at your network pharmacy;
    - Notification the moment your medication is ready for collection from your network pharmacy;
    - Monthly follow-up if your chronic medication was not collected timeously.
  - ✓ Disease Risk Management, through:
    - Health Risk Assessments within the PMB rules of your medical scheme option, for which your medical scheme has to pay in full, to monitor certain PMB condition(s) that you are registered for and to refer you to your doctor if uncontrolled;
    - Recommendation of Complementary Medicine to ensure a holistic approach towards the management of your PMB condition(s).

## Why should you consider AlphaScRipt as your preferred provider for chronic medicine?

AlphaScript and your Community Pharmacist:

- ✓ both share the sentiment that the quality of chronic medication supplied through a chronic mail order system may be compromised due to the uncontrolled conditions during the transport and storage thereof;
- ✓ oppose the fact that there is no personal professional supervision by a pharmacist at the point of delivery thereof;
- ✓ subscribe to the principle of personalized service, one-to-one communication, professional counselling and furnishing of advice between the pharmacist and the patient at the point of service.

## Are you the patient better off?

- AlphaScript and your Community Pharmacist strictly adhere to all the cost containment rules of your medical scheme to make sure that your chronic benefits last longer and to reduce your out-of-pocket expenses as a result of co-payments;
- AlphaScript and your local community pharmacist do not charge any non-healthcare related administration fees;
- AlphaScript and your local community pharmacy offer you the added convenience of not having to stand in long queues, by allowing you to collect your medicine at a time convenient to you on the due date from your local network pharmacy;
- AlphaScript, together with your local community pharmacist:
  - ✓ take full responsibility for the responsible management of your chronic disease; and
  - ✓ will monitor and manage your compliance to ensure that you enjoy good quality of life!

## What do you need to do?

Complete the Patient Registration Form here below and simply asks your community pharmacist to send your chronic prescription and chronic authorization forms to AlphaScript and we will do the rest!
